## what other brands of lenses fit my Bessa-R

Posted by Tom - 2007/11/01 06:20

---

Are there any economy lenses out there to give me a taste of what a good lens will do??? that will fit my Bessa-R  
Thanks

Any of the ukranian LTM lenses will. I have a Jupiter-8, which is decent. Older Leica lenses are LTM, too. Of course, if you want to buy new you can get any of the CV lenses in an LTM mount :)

At my R3a I use the Summicron 2,0/40 (Bajonett Mount) and the Jupiter-9 2,0/85 (LTM with M-adapter). The Jupiter is similar quality as the Leica. You can get it about 50-100\$ or less, but please give it a service and you get a first-class-lens.

His Bessa R is an LTM mount

I know. I only mentioned the Summicron, because I can compare the (LTM) Jupiter-9 quality with this outstanding lens.
